

OUR COMPANY

Established in 2006, Complus Chemicals, is fully licensed and insured for general liability as well as all applicable workers' compensation claims. We have a highly trained workforce and emphasize professionalism and integrity.

All our facilities are safe, clean and free of drugs and alcohol. We empower our employees with state-of-the-art tools and equipment, analytical services and procedures.

OUR TEAM

Ladd Naquin

"The success of your business keeps us in business, too. That's why we're always looking out for your best interest." Ladd Naquin is the Manager Chemical Division North America of Complus Chemicals.

Ladd Naquin helped to build Complus Chemicals from the ground up. From his own experience in the oilfield support industry, he knows what you want and need. Complus Chemicals provides reliable, high-performance products and an honest, knowledgeable sales team.

The Complus Chemicals team, which includes engineers and certified laboratory technicians, has more than 85 combined years of experience.

SAFETY

We comply with all OSHA and EPA regulations, adhere to safe work procedures and provide extensive safety training to our employees on a continual basis. Our comprehensive vehicle and equipment maintenance program also contributes to an outstanding safety record.

STEWARDSHIP

Through the use of quality materials and procedures, we are committed to conducting business in a way that minimizes environmental impact and helps preserve the earth's natural resources for generations to come.

Results within reach.

PRODUCTION CHEMICALS

Our line of custom blended production chemicals, combined with professionalism and a highly-trained service team, makes all the difference. We keep your wells flowing at maximum capacity with the greatest efficiency and at the lowest possible cost without sacrificing quality.

Performance in the field is critical to your success, so count on Complus Chemicals to come through every time.

Our extensive product line includes but is not limited to:

- Demulsifiers
- Paraffin inhibitors
- Paraffin dispersants
- Defoamers
- Water clarifiers
- Scale inhibitors
- Corrosion inhibitors
- Biocides
- Surfactant acids
- Oxygen scavengers
- Hydrogen sulfide scavengers
- Carbon dioxide scavengers
- Foamers
- Soap sticks
- Salt inhibitors
- Hydrate inhibitors
- Flow-enhancement products
- Specialty products and more

TESTING & INSTRUMENTATION

As an all-in-one solution, Complus Chemicals not only provides professional laboratory services, but we also provide the production chemicals to treat or correct the issue.

Laboratory Testing Services we provide:

- Comprehensive water analysis with scaling indices
- Foaming tendencies
- Viscosity (cps)
- Conductivity and resistivity
- Suspended and dissolved solids
- FTIR analysis
- Scale analysis
- Chemical compatibility
- Oil and grease by IR
- Corrosion and scale coupon analysis
- Chemical residual analysis
- Membrane filter analysis
- Comprehensive crude oil analysis
- API gravity
- Cloud point by DSC
- Pour point by DSC
- Asphaltene content
- Cold filter plugging point by DSC
- BS&W
- Acid Reducing Bacteria (ARB)
- Sulfate Reducing Bacteria (SRB)
- Bacteria cultures
- Flash point

Instrumentation Services:

- Titrating chemicals
- FANN solids report
- FANN EP lubricity tester
- FANN HTHP & API fluid loss cells
- Induced Coupled Plasma (ICP)
- Fourier Transmitting Infrared (FTIR)
- UV/Visible spectrophotometer
- Differential Scanning Calorimeter (DSC)

MANUFACTURING & BLENDING

Complus Chemicals custom blends products for your oilfield production needs. We constantly monitor quality control and field performance to ensure our products perform as expected.

With blending facilities in Louisiana and Texas, we have the ability to quickly and efficiently provide products and services to oil and gas operators, plants and refineries throughout North America.

COMPLETION SERVICES

Complus Chemicals utilizes a proven hydrocarbon recovery system that features outstanding well-completion technologies.

We are an authorized distributor of NanoActiv HRT, which utilizes nanoparticles that move throughout fracture networks while releasing hydrocarbons. NanoActiv HRT is highly effective, reaching deeper and farther than any other product on the market.
