Home and Mobile IPTV

- ◆ **Huge choice of traditional and WEB TV channels:**
 - You can watch TV at home on your PC or TV-Set
 - You can watch TV on your Freecoms mobile phone.
 - Freecoms can optionally create custom IPTV channels for those companies which wishes to advertise their products and/or services on TV to Freecoms community.
 - To watch the TV costs nothing as it is part of the flat rate package offered by Freecoms.

Home and Mobile IPTV

- ◆ **Huge choice of traditional and WEB TV channels:**
 - **On Freecom's WEB TV all the international channels are available, as well as Local most famous TV channels.**
 - **TV is accessible via Phone, PC and TV-Set connected to a digital set-top-box supplied by Freecom's.**

SMS and/or IM messaging

- ◆ **A totally new way to communicate:**
 - **Freecoms Customers use their Freecoms mobile phone to send old style SMS messages to anyone or...**
 - **They can use a more modern way to communicate: online-live chatting via IM (Instant Messaging), just like you do on your PC with traditional messaging programs, to and from all the other Freecoms users.**

SMS and/or IM messaging

- ◆ **A totally new way to communicate:**
 - **In addition to online IM messaging, when your Freecom mobile phone is connected via wifi or, in the future via 4G, you can also activate the cool video chat (the equivalent of MOBILE video calls with a small difference: it is free of charge !!!).**

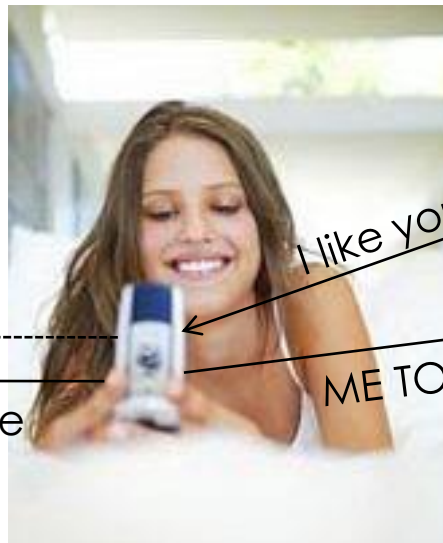

Advantages of Instant Messages: sometimes faster is better

SMS

I like you so much

Sorry guy...too late

I like you so much

ME TOO !!!

IM

Advantages of Freecoms video chat vs 3G video calls ???

UNDERSTAND
!!!

3G user

Freecoms is COST EFFECTIVE

- ◆ **Freecoms gives a better service almost for free...and in the future it will be completely free. How?**
 - ▢ **The main target of Freecoms will be at the very beginning to create a big base of users offering them premium quality services for a very small price.**
 - ▢ **Step by step, due to the increasing number of users, Freecoms will become more and more interesting to the companies which wants to place their advertising campaigns on Freecoms portal services like IPTV, Virtual environments given by the second life style interface etc.**
 - ▢ **Once the number of collected advertising contracts will reach the critical mass , it will be virtually possible for Freecoms to offer its services to private people completely for free !!!**

Freecoms is COST EFFECTIVE

- ◆ A completely different approach . The differences between Freecoms and the others:
 - Incumbent operators waits the Customers at their shops and push them to sign a paper (the contract) to get the chance of communicating via a phone.
 - Freecoms services can be activated by the users in a very comfortable way, sitting at home by simply using a personal computer or calling a dedicated call center. If the users like to move they can also go to activate Freecoms services at the cashier of the commercial centers or gas stations available on the streets.

Freecoms is COST EFFECTIVE

- ❑ To access the service of the incumbent operators a user must buy a telephone.
- ❑ Freecoms in its activation package will give a free telephone inclusive of Freecoms SIM card and activation instructions and send it for free at the place indicated by the user within 24 hours. If the user cannot wait 24 hours, he can also get the activation package at the cashier of the commercial centers or gas stations available on the streets.

Freecoms is COST EFFECTIVE

- Once the user has signed a contract with the incumbent operator, that do not indicate the expiry date, has been pushed to buy a telephone, will have the great chance to make phone calls and each one of them will have to be paid at different tariffs depending where the calls are made. THANKS SO MUCH...
- Freecoms service is activated online by the users without signing anything. The expiry date is one year from the activation and if the Customer will be happy he will be able to renew the service online at the end of first year.

Freecoms is COST EFFECTIVE

- ❑ **Freecoms service is not simply the chance of making telephone calls but much, much more. The Freecoms users have full access to an entire world of online services available through the Freecoms WEB Portal, including watch TV, listen to radio, watch movies, read newspapers, find new friends, chatting and video chatting, find a job online, play online games and buy what he needs online in the Freecoms virtual shops. All that can be done through the Freecoms mobile phone or via PC. All of that is included in the Freecoms package. Isn't that fantastic?**

Freecoms is COST EFFECTIVE

- **ALL RIGHT ALL THAT IS GREAT...BUT WHAT ABOUT THE COST ?**
 - **Well, like all the companies also Freecoms needs to make profit, but Freecoms profit will be based on volumes so we will keep the margin of profit on the single Customer extremely low.**
 - **In simple words the monthly cost for Freecoms services will be a flat rate of 25 EURO inclusive of all the WEB Portal services and inclusive of all the telephone calls the user will make to other Freecoms users and virtually also all the calls made to other operators users in China or abroad with very few limitations.**

Freecoms is COST EFFECTIVE

- **Ok Freecoms costs 35 EURO per month and gives you a lot more.**
- **The average bill of an incumbent operator goes from 25 EURO to 40 EURO per month for a normal user and better not to say how much for a business man. This costs, remember, are all for the only service the incumbent offer: to make phone calls and send SMS. Very poor service for such money. Don't you think so ???**

Freecoms is COST EFFECTIVE

- Let's make some simple math operations to understand better:

Traditional services (different suppliers)

Smartphone (3G/4G)	200EURO
Telephone local calls	25EURO
Telephone calls abroad (ohhhh)	25EURO
Digital TV or similar	15EURO
Watch on demand movies (based on 4 movies a month)	10EURO
Professional CV published	5EURO
Newspapers	10EURO
Play online games	10EURO
Subscription to dating sites	10EURO

TOTAL FIRST MONTH 310EURO

Freecoms services 35EURO

Telephone (3G, wifi, wimax)	Included
Telephone calls in Estonia	Included
Telephone calls abroad	Included
WEB Digital TV	Included
Watch on demand movies (based on 4 movies a month)	10EURO
Professional CV published	Included
Newspapers	Included
Play online games	Included
Community text and video chat	Included

TOTAL FIRST MONTH 35EURO

Difference 1st month – 275 EURO
 Difference other months – 75 EURO

WOW

Freecoms is COST EFFECTIVE

- **What about advantages to the companies ?**
 - **Hard to say exactly but further to the even higher cost savings for the telephone calls (an employee can easily spend more than 100 EURO per month, while with Freecoms is anyway 35 EURO) there is to take into account the enormous amount of money which can be saved on business trips, rent of offices etc by using the Freecoms virtual business meeting rooms and conference rooms.**

Freecoms is COST EFFECTIVE

- **What about advantages to the companies ?**
 - Furthermore if a company needs to find candidates to employ, it is possible to read the CVs available in Freecoms jobs room and eventually interview online in videochat the selected candidates. In this way a lot of costs due to expensive job agencies and offices to meet the candidates can be saved.

Freecoms is COST EFFECTIVE

- **What about advantages to the companies ?**
 - Infrastructure costs due to rent of spaces for trainings can be saved thanks to Freecoms virtual meeting rooms.
 - Thanks to the availability of business TV channels and Business newspapers, the managers can always keep themselves updated without the need of buying any additional material.

Freecoms is COST EFFECTIVE

- **What about advantages to the companies ?**
 - If a company has branches abroad, Freecoms can give to those branches Estonian VoIP numbers in such a way to let them be connected to Freecoms community network via internet for FREE.
 - At the same time Freecoms can give foreign numbers to the Estonian branches of foreign companies in such a way to permit to the mother company abroad to call at local rates.

Freecoms is COST EFFECTIVE

- **Companies can dramatically increase their business:**
 - Companies can place their advertisements in the Freecoms virtual rooms and on the main receptions. The potential number of visitors, as it can be imagined, will be extremely high.
 - Companies can sell their goods in suitable customized virtual shops.

Freecoms is COST EFFECTIVE

- **Companies can dramatically increase their business:**
 - In the business section of Freecoms community the companies can meet, share their experiences and expand their business contacts
 - Freecoms will soon open its services in other countries, so the quantity of companies to meet in the Freecoms portal will be huger and international.

BUSINESS MODEL

Advertising contracts to cover telephone costs

- **The main target of Freecoms is to step-by-step reduce to zero the bills of its Customers.**
 - **The main goal for Freecoms revenues is to collect as many advertising campaign for companies and individuals as possible. In that way, it will be step-by-step possible to cover completely the bills expences due to Freecoms users customers. The delta AD-Contracts – Customers Bill= Freecoms income. Easy and ingenious !**

Freecoms users are also Freecoms agents

- **Every single Freecoms users is a potential Freecoms agent**
 - **Every Freecoms users pays at the beginning of its contract a flat rate of about 35 EURO per month and receive in exchange a virtually unlimited number of national and international calls, as well as all the sophisticated services available on Freecoms WEB portal.**

Freecoms users are also Freecoms agents

- **Every single Freecoms users is a potential Freecoms agent**
 - If a Freecoms user suggest a company or an individual which is willing to pay an advertising campaign of at least 200 EURO per month for totally 2 years and if the contract is finalized by Freecoms official agents, the Freecoms user receive immediately in exchange a two years free telephone traffic for up to 35 EURO per month. If let's say 20.000 users, brings to Freecoms at least one customer, the income for Freecoms will be $2400\text{EURO} \times 20.000 \text{ users} = 48 \text{ MIO EURO}$ per year !!! Of course the Freecoms user and the Freecoms advertising customer can be the same person. That's basically an income with no employees to pay !!!

Freecoms official agents

- **Freecoms official agents scope of work**
 - **Freecoms official agents can propose the same business model to companies and public administration. If the company is willing to pay the double of the basic contract, it can get in exchange a total amount of free traffic equal to the basic contract and get an advertisement campaign on Freecoms Portal.**

Freecoms official agents

- **Freecoms official agents scope of work**
 - If a company or public administration is willing to advertise only, just because Freecoms portal will have an enormous number of daily visitors, the contract might have the same value and half of it can be used to give free of charge traffic to selected Freecoms users. In this case, we can indicate on the portal that thanks to the company ZZZ, xx number of Freecoms users has been awarded with a free of charge traffic of **35 EURO/month for 2 years. Again Easy and ingenious !!!**

Freecoms – Users and Provider relations

- With the proposed business model, the users can potentially receive up to 35 EURO of free traffic per month. If the monthly traffic exceed the 35 EURO, the user has to recharge his account. If at the end of the month, the user do not use entirely the 35 EURO of free traffic, the remaining is lost, but Freecoms pays to the VoIP platform operator only the used traffic, keeping to itself the unused one as additional profit.

The WEB portal is the real value of Freecoms

- If the business model is understood clearly, anyone can understand that the real asset of Freecoms will be its web-portal because:
 - Through the applied business model, the number of visitors, which is equal at least to the number of users, will dramatically and rapidly grow, making the Freecoms Community Mobile Operator WEB Portal a social network so big to be greater than anyone else, including the famous Facebook and Twitter !!!
 - More users Freecoms will have and more visitors will be available on the web-portal which will be automatically considered by the advertising point of view an excellent media.

Freecoms portal potential value

- **About three years ago, Microsoft offered 45 BLN USD to buy out Yahoo.**
 - **The total number of internet users worldwide is around 1.5 billions. Around 25% of all the users visits Yahoo pages daily. That is equivalent to 375 MLN visits per day.**
 - **In other words, Microsoft offered 120 USD per each of the 375 MLN users visiting Yahoo every day.**
 - **If Freecoms will reach let's say around one million visits per day (which is a very reasonable number if we will operate in three or four countries), a very conservative value of the Freecoms portal can be 120 MLN USD !!!**
 - **The offer of Microsoft has been rejected by Yahoo !!!**
